Professional Summary

Software Developer with 2 years of experience building and operating production systems on AWS and on-premise environments. Specializes in **Django / Django REST Framework** API development, robust **database design**, and **CI/CD automation** with Jenkins. Hands-on with **Docker**, infrastructure security, and system observability. Experienced in **AI/LLM integration** and cloud-native deployments. **AWS Certified Cloud Practitioner** with a proven record of delivering secure, scalable solutions.

Education

B.E. Computer Science — Cambridge Institute of Technology

Aug 2019 – Aug 2023

Technologies & Skills

Category	Technologies
Languages	Python, C, C++
Backend & Frameworks	Django, Django REST Framework, ReactJS, REST APIs, Celery
Cloud Platforms	AWS (EC2, S3, RDS, IAM, VPC, CloudWatch, Route 53, Lambda)
Containers & Orchestration	Docker, Kubernetes, Helm
CI/CD & Automation	Jenkins, Git, Bash Scripting
Security & Quality	SonarQube, Trivy, OWASP Dependency-Check
Databases & Search	SQL, Redis, Elasticsearch
Observability	Prometheus, Grafana
Operating Systems	Linux, Windows
AI / ML	LangChain, RAG, ChromaDB

Experience

Software Developer

Feb 2024 – Present

Innefu Labs Pvt. Ltd. — Client: CENCOPS, Chandigarh Police

- Designed a **Django REST Framework** backend supporting **multi-terabyte file uploads** with **Celery**-powered background processing, file chunking, and automated labeling.
- Built an **ETL pipeline** processing **1M+ API responses** and streaming data into **Elasticsearch**, enabling real-time analytics and investigative dashboards.
- Implemented **Jenkins CI/CD pipelines** automating build, test, and deployment workflows, **reducing manual deployment effort by 60%**.
- Containerized microservices with **Docker** and optimized throughput for large-scale file transfers using asynchronous task execution.
- Managed **AWS production infrastructure**: configured **Nginx** reverse proxy, domain routing via **Route 53**, and **Certbot SSL** for secure HTTPS access.

Software Developer Intern

Sept 2022 – Feb 2023

Samsung Prism

- Developed a multilingual chatbot using **Python**, **RASA**, and **spaCy**, achieving a **4/5 user satisfaction score** in post-deployment feedback.
- Improved **NLP intent recognition accuracy by 20%** through iterative model fine-tuning and dataset augmentation.

Key Projects

KanoonSarathi.AI — Legal AI Assistant

- Built a backend using **LangChain**, **RAG**, **Gemini LLM**, and **ChromaDB** for real-time legal document retrieval and question answering.
- Deployed on **Kubernetes** with **Helm charts**; integrated end-to-end observability using **Prometheus** and **Grafana**.

DevSecOps CI/CD Pipeline

- Integrated automated security scanning into CI/CD using **SonarQube**, **Trivy**, and **OWASP Dependency-Check** to enforce code quality and vulnerability gates.
- Standardized **Docker** image builds and **Jenkins** pipeline orchestration, ensuring consistent and reproducible deployments across environments.

Recognition & Certifications

- Awarded by the **Director General of Chandigarh Police** for delivering a secure case management system ahead of schedule.
- **AWS Certified Cloud Practitioner** — Amazon Web Services.
